Kilkis and Lemnos

The old Pre-Dreadnought *Kilkis* was serving as a gunnery training ship at Salamis when the Germans invaded. Her sister ship *Lemnos* had been disarmed, hulked, and much of her armour removed for shore fortifications. Although *Lemnos* was only an accommodation hulk, she and *Kilkis* were both sunk by German air attack.

Hello

Greece's only light cruiser of this era, *Helle* had been purchased in 1914 the New York Ship Building after the Chinese, who had originally ordered her as the *Chao Ho*, were unable to pay for her. She was rebuilt in 1926-28 and turned into a minelayer. She was sunk by the Italian submarine *Delfino* while at anchor, before hostilities had commenced.

Giorgios Averoff

Giorgios Averoff, half sister of the Italian Pisa armored cruiser of pre WW1 vintage, was refitted and re-boilered before WW2 and was in very good condition at the outbreak of war despite her age and obsolescence. After escaping to Alexandria following the fall of Greece, she spent the remainder of the war patrolling the Indian Ocean. Today, "Lucky Uncle George" proudly serves as a preserved museum ship.
